

NE&SS-Undersea Systems Recognizes Protège Firms

Sushma Kohli, CEO
Fulcrum Corporation

Michelle McKinney, CEO
M & M Technical Services, INC.

Naval Electronics & Surveillance Systems-Undersea Systems was recently awarded a \$615 thousand contract by the Space & Naval Warfare Systems Command to implement a new Mentor-Protège Program. The current contract runs through May 2005.

NE&SS-Undersea Systems will provide overall developmental assistance and mentoring support to Fulcrum Corporation in Fairfax, Virginia, and M & M Technical Services, INC. in Woodbridge, Virginia.

Fulcrum Corporation, a certified Woman-Owned Small Disadvantaged Business, is an integrator of ideas, technology, processes, and products that offer new benefits to the government and private sectors. Fulcrum provides research, engineering, system integration services, signal processing, modeling and simulation, and information processing technologies to solve challenging problems with a focus on developing system requirements across diverse organizations and technologies thereby synthesizing solutions to meet these requirements. The corporation's clients include Defense Advanced Research

Projects Agency, Naval Sea Systems Command, Office of Naval Research, Naval Surface Warfare Center, Naval Undersea Warfare Center, U.S. Army, U.S. Coast Guard, Federal Highway Administration, and Federal Railroad Administration.

M & M Technical Services, INC. is a certified Woman-Owned Small Disadvantaged

Business with a full line of IT offerings. The company's core businesses span system engineering, software development, database development, and network design. M & M has the expertise to develop requirement analysis, B-Level spec requirements, trade studies, white papers, system design documentation, interface design documents, system verification and test, system test plans, configuration management support, and training throughout the continental United States. M & M has a cleared facility and has provided support to numerous DoD agencies, including DISA, NEXCOM, FAA and USDOT.

Established by Congress in 1991, the Department of Defense Mentor-Protège Program was implemented to encourage DoD prime contractors to work with small disadvantaged businesses to increase their opportunities for DoD prime and subcontract business.

Undersea Systems has a history of working with small disadvantaged businesses and minority-owned businesses throughout the Washington metropolitan area. The company has hosted numerous Small Disadvantaged Business Supplier Showcase Days, where small disadvantaged businesses display their capabilities to company technical and procurement communities and participated in two previous Mentor-Protège Programs successfully graduating the protégé firms from the program. In addition, the Defense Contract Management Command, Baltimore has awarded the company annual Outstanding Company Awards.

As per Public Law 101-510 (Section 831) contractors may award subcontracts on a non-competitive basis to protégé firms. For additional information on protégé capabilities and subcontracting with our protégé firms, please contact Leona Johnson, Mentor-Protège Program Manager at 703.367.2107 or via email at leona.johnson@lmco.com.
